

PESTO / CRAWLING INSECT KILLER

WORKS NATURALLY - NO STOMACH POISONS OR NERVE TOXINS

REGISTERED USDA NATIONAL ORGANIC PROGRAM

Pesto Crawling Insect Killer (CIK) is an all Natural "Organic" Green broad-spectrum desiccant dust that has been proven effective against a wide range of crawling insects. It is approved for both indoor and outdoor use, including sensitive ecosystems. It is approved for food storage and food preparation areas as well as pet bedding and feeding areas. It is a safe alternative to commonly used poisons of which insects become immune over time. Chemical pesticides consist of stomach poisons and nerve toxins that have been linked to many potentially fatal health issues in humans and other mammals. Pesto CIK consists of a 100% natural product, making it ideal for use in the home, farms, schools, hospitals, multi family housing facilities, and commercial buildings. It works mechanically by dehydrating insects through a desiccating action, which is safe, earth-friendly and effective. Target pests cannot become immune to Pesto CIK as they do the chemical pesticides. Unlike chemical products, Pesto CIK only requires contact to be effective. Pesto CIK provides outstanding potency without introducing poisons to the person applying the product, the area requiring treatment, and environment. Pesto CIK applies evenly and simply, leading to an easy to use product that gets results.

SPECIFICATIONS

- 100% Natural active ingredient
- No toxic chemicals or poisons
- Not harmful to fish or birds
- Safe to use around water supplies
- Cumulative, Sustainable & Long Term
- Mode of action: Desiccant
- Meets organic & Kosher Cert. Requirements

SAFE & EFFECTIVE TO MEET YOUR REQUIREMENTS

OUTSTANDING PERFORMANCE

- *Highly Absorptive dust for broad spectrum control and happy customers*
- *Easily covers cracks, crevices and voids*
- *Long-lasting control provides continuous protection from insects*
- *Desiccant mode of action does not require insects to ingest the product*
- *Origin from natural and organic resources*

VARIETY OF USEAGE AREAS

- *Business and commercial areas*
- *Homes and residential buildings*
- *Food and feed handling establishments*
- *Institutional areas and schools*
- *Agricultural Facilities*
- *Livestock and Poultry production facilities*

COST EFFECTIVE

Pesto CIK's physical properties result in a low-density product. Low-density equates to more coverage per pound of product.

APPLICATION TIPS FOR USE

- *Lightly dust cracks, crevices and voids where long-lasting control is needed*
- *For best results, use in dry areas (if product becomes wet, once dried out it will continue working)*
- *Great for sensitive areas and ecosystems*
