

HAPPIER, HEALTHIER STOCK AND IMPROVED PRODUCTION

A COST EFFECTIVE PRODUCT FOR CLEANER, MORE PROLIFIC ANIMALS

Pesto Feed Additive mixed in the feed, coats the feed, allowing it to “flow” better. Our product’s absorptive ability protects the feed from mold. No mold means less wasted feed. By separating the particles of feed, the animal’s digestive enzymes are able to better utilize each particle. This allows a more complete digestion. The animal gets more benefit from its feed and the farmer more benefit for their feed dollar.

CUSTOMERS HAVE REPORTED

- Increased feed conversion rate
- Improved daily weight gain of young stock
- Removal of internal parasites
- Control of mold in stored feed
- Reduced mortality
- Suppresses odor
- Provides fly control in manure
- Healthier farm practices / animal life

FEED APPLICATION RATES

Pesto feed supplement is to be mixed at a rate of 2% of the dry weight of the feed (e.g. 2 lbs per 100 lbs)

HORSE & CATTLE	2 lbs per 100 lbs
CHICKENS - DRY GRAIN	1/2 tsp per cup grain
TURKEYS, GEESE, DUCKS	1/3 tsp per cup grain
HOGS & SHEEP (FULL GROWN)	2 lbs per 100 lbs
HOGS (MEDIUM SIZE)	1 lb per 100 lbs
BUFFALO & ELK - DRY GRAIN	2 lbs per 100 lbs
DOG (LARGE) - DRY FOOD	1 tsp per 2 cups
DOG (SMALL) - DRY FOOD	1 tsp per 1 cup
DOG - MOIST CAN FOOD	1 tsp per 16 oz can
CAT - DRY FOOD	1/3 tsp per cup
CAT - MOIST CAN FOOD	1/8 tsp per can

US EPA REGISTERED & REGISTERED USDA NATIONAL ORGANIC PROGRAM

- Crop Protection Aid
- Disease and Pest Control
- Fertilizer and Soil Amendment
- Livestock Production Aid
- Processing and Handling

A MULTI-BENEFICIAL, ORGANIC FEED ADDITIVE

ATTRIBUTES

- *Registered Product of USDA National Organic Program*
- *Improves condition of stock by reducing parasite and insect burden*
- *Improves stock's feed nutrient uptake and self-defense against fungal attack*
- *Improves elimination of internal parasites (replaces feed-thru paraciticides and no need to add arsenic to poultry feed in order to eliminate these parasites)*
- *Suppresses mold in Grain & Feed storage*
- *Reduces insect problems on and around poultry and livestock, in Housing Facilities and Feed storage*
- *Reduces odors in manure compost and confinement facilities*
- *Pesto Feed Additive meets Organic and Kosher certification criteria*

SEQUESTERING GAS EMISSIONS

Specifics of what Pesto Feed Additive can do in sequestering gas emissions:

- *Ability to suppress livestock odor internally and externally, in feces and manure (also killing fly larva in the animal waste - and killing flies in Dairy barns and animal confinement buildings of all types)*
- *The extraordinary large pore volume of Pesto Feed Additive provides the ability to suppress odor by binding-up and holding any type of VOC gas emission. Pesto Feed Additive has historically been used in cattle feed; as a "buffer" to reduce gas and bloating and as an anti-caking agent, allowing greater "break-up" and absorption of feed in the intestine.*
- *Pesto Feed Additive breaks up and desiccates molds that develop in stored feeds. These Aflatoxin/Mycotoxin in molds are known to increase the gas bloating in livestock.*
- *The Pesto Feed Additive pore volume also makes it a more effective "carrier" for any selected microbes used to increase nutritional values including the type of microbes used to reduce methane gas emissions.*
